SUMMARY

Fresh graduate in Informatics Engineering with hands-on experience building full-stack web applications and business systems from end to end. Proven ability to deliver production-ready solutions — including a live ADHD screening web app used by real users and a desktop POS system built for real business operations. Proficient in PHP, JavaScript, MySQL, and modern tooling, with additional exposure to AI integration (RAG, LangFlow) that adds practical value to web projects. Eager to contribute to a team that values clean code, real impact, and continuous growth.

EDUCATION

Bachelor of Informatics Engineering, Universitas Pamulang

Sep 2021 – Des 2025

GPA: 3.20/4.00

Relevant Coursework: Software Engineering, Database Systems, Web Development, Artificial Intelligence, Machine Learning, Expert Systems, OOP, Project Management, Software QA Testing.

EXPERIENCE

PT LAFIYE MODE INDONESIA | Software Developer Intern

Mar 2024 – Jun 2024

- Built a production-ready desktop POS system covering full cashier workflow — transaction processing, inventory tracking, employee management, and sales reporting.
- Implemented role-based access control and automated transaction recording that replaced manual processes, delivering a complete handover-ready application within a 4-month internship period.
- Tech stack: JavaScript, jQuery, Electron.js, React.js, SQLite

PT VADS Indonesia | Telemarketer

Jun 2019 – Nov 2019

- Handled outbound customer communication, identified client needs, and delivered solutions to drive sales and improve satisfaction.
- Strengthened communication, negotiation, and problem-solving skills in a target-driven environment.

PROJECTS

ADHD Screening System | Full-Stack Web Application | adhdetect.page.gd

May 2025 – Des 2025

- Designed and developed a full-stack ADHD screening web app from zero to production — including diagnostic logic using Expert System & Certainty Factor method, user authentication, role-based access control, and responsive UI.
- Successfully deployed to live hosting and used by 10–50 real users, validating the app's usability and reliability.
- Built entirely as a solo end-to-end project, covering backend logic, database design, UI, and deployment.

Tech stack: PHP, MySQL, Bootstrap, JavaScript, HTML, CSS

POS Smart Cashier System | Full-Stack Business Application | github.com/Lafiye-DeskPos

Mar 2024 – Jun 2024

- Developed a Point of Sale system for PT Lafiye covering transaction management, inventory tracking, cashier workflow, and sales reporting with CRUD operations and payment processing.
- Replaced manual cashier processes with automated transaction recording and structured database design, improving operational reliability.

Tech stack: JavaScript, jQuery, Electron.js, React.js, SQLite

Fashion Assistant AI | AI Pipeline / RAG Application | github.com/ai-fashion-asisst

Apr 2026

- Designed and built an AI-powered fashion recommendation assistant using Retrieval-Augmented Generation (RAG) with full pipeline: document ingestion, text splitting, embedding, vector storage, and chat retrieval with conversation memory.

Tech stack: Langflow, RAG, AstraDB, Google Generative AI, Python

SIMPENTING | UI/UX Design | [figma.com/proto/SIMPENTING](https://www.figma.com/proto/SIMPENTING)

Apr 2025 – Jun 2025

- Designed a complete mobile app for student task and schedule management with full design system: onboarding, authentication, dashboard, task management, calendar, and notifications.
- Delivered a high-fidelity interactive prototype with consistent component library and design tokens.

Tech stack: Figma, Prototyping, Wireframing, Mobile UI Design

TECHNICAL SKILLS

Languages: PHP, JavaScript, Python, HTML5, CSS3, SQL

Frameworks & Libraries: Bootstrap, jQuery, React.js, Electron.js, Laravel (Basic)

Database: MySQL, SQLite, AstraDB, Vector Database, ERD, CRUD

AI & ML: Langflow, RAG, Prompt Engineering, Google Generative AI, ML Basics

UI/UX: Figma, Prototyping, Wireframing, Mobile UI Design, Responsive Web Design

Tools: Git, GitHub, XAMPP, cPanel, VS Code, OOP, System Analysis & Design

CERTIFICATES

Dicoding: Web Programming, JavaScript, SQL, Python, Data Science

IBM SkillsBuild: Build an AI Agent, Generative AI, Artificial Intelligence

Kaggle: Introduction to Machine Learning, Python
